A Banach space is a vector space  $X$  over the field  $R$  of real numbers, or over the  $C$ . If  $M$  is a closed linear subspace of a normed space  $X$ , there is a natural norm on every Banach space is isometrically isomorphic to a subspace of some  $C(K)$ . .. of non-reflexive spaces  $X$ , the bidual  $X^{**}$  is much larger than  $X$ .
